Searching for programming gigs with Microsoft Access. Does anyone have any? Contact via email found in CV nearby. Who would tell Microsoft to not force their updates, which have blue background and a label 'this might take sometime'. In one occasion, it takes 35 minutes and is still updating. Luckily Linux Mint 19.3 64 bit is a good alternative to Windows 10/11. They explain their updates better.

Bad experience at housing as a worker at HKI drove me back at Varsinais-S. What is this no chance life some people are offering? Offering deals that are cul-de-sac. Unbeatable impasse. Aii want just money -attitude makes us all broke. "Don't care of your destination, since it is not my prob"-way of going

is a never-ending scissor to good projects... Don't want to prove that in total. There are people who seem to think "I've got nothing to lose, if I start a bit war here and there". You think wars start when a news artist has written it on a papa (paper) na na, a papa, Pa-Pa: Mo-mo-mo-monster-ki%%, ki%% (cs16withbots.exe)

## Murunda Oy

### Murunda VBA Programmer

February 2004 - March 2010 (6 years 2 months)

Salo, Southwest Finland, Finland

Somewhere along the lines I took a career break. To see, when I had vivid "working abilities" I suddenly then again didn't, they disappeared after I took 1, week "my own decision" break from looking at the code at the office. I couldn't concentrate or make the code come off the manuals to my ideas faster. I wanted then to hide and seek where is the information going. I thought life was always about coding faster. Something hopefully learned along the lines...

This was electricity solution dealing business. I can't tell a-lot.

## Design Centre MUOVA
